### ADS DESIGN

This is a practice work of graphic advertisement design for Nescafe. It is supposed to show that Nescafe is able to bring inspiration to its customers. I use 3D max to build the scene and set the warm atmosphere, then use Photoshop to add the steam.

### ADS DESIGN

This is a practice work of using contrasting colors for designing. It was designed on my second year in college.

I use orange and blue to add vigour of youth. It is supposed to show that this orange juice is sweet, cool and full of energy.

2nd

This is a logo design for a new brand of underwear called Yimeilin. It is supposed to show the natural of the brand who aimed at the woman who are tender, elegant and focused on their health. I designed 3 logo as below, the first party chose the first one.

LOGO

TopReading Project is a small club sharing understanding of academic research of the top students in the School of Communication and Design in Sun Yat-sen University. I am in charge of designing a logo for this project. By combining the profile of our department building and the image of a book I want to show the core value of this project.

3rd

### UI DESIGN

I designed the UI of a weather APP called Feather which can show the weather of the place that your friends was living in. One can send messages to friends if they were suffering bad weather or just send a 'like' to show the care.

### UI DESIGN

I designed the UI of this APP called NEXT which allows people to let their cellphones choose what they could do next.

Users could pull the string and the pointer would show them what they can do randomly and who can join in. This APP is for the ones who do not know how to plan for their leisure time or who do not have friends to share feelings.

3rd

### UI DESIGN

I designed the UI of this APP called College Elf, which allows college students to check all the message they may use, including one's syllabus, exam schedule, borrowed books, college news, and other useful messages. What's more, it provide a small platform like "Quora" for studens only, which allows them to ask questions of all kinds.

This app won us the 2nd prize in the 1st Emerging Media Innovation & Entrepreneurship Competition in Shenzhen Press Group.

http://graduate.sysu.edi http://ecampus: 招生狀系譜孔章:

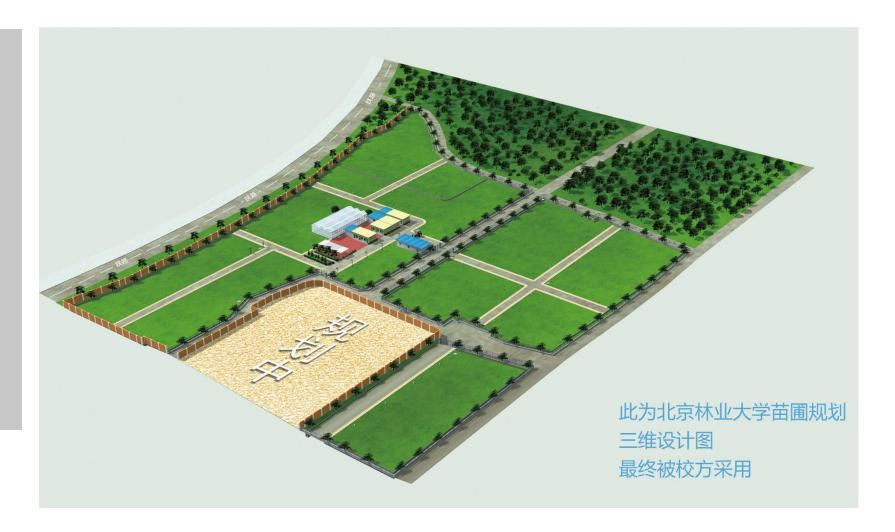

This design was to show the public space of Wudaokou Subway sation in Beijing, which can direct the passengers to find their way to the right place without asking.

## 3D DESIGN

This design was to depict the space of the farm land of Beijing Forestry University. It has been put into use to show the land planning of this area.

## 3D DESIGN

## 3D DESIGN

This is a 3D animation I designed, which based on the famous Chinese classical novel Dream of Red Mansions. This animation showed the scene of Grand View Garden. We also designed a computer game which enables users to go around that place and gain some basic knowledge about the book.

5th

### 3D DESIGN

This is a 3D animation I designed, which tells a sad story about a lady from a wellbred family and her beloved general. They have to broke up because the girl is supposed to be the Emperor's concubine. This scene is designed by myself.
